

# Teraverde® Batch Update Utility for Encompass®

## Batch Update Utility

- **What it Does:** The Batch Update Utility lets a user update any single or group of fields for a group of loans in a batch format from a list of loans. No need to access each individual loan. As you can see, it's easy to use and can update field values, run business rules, lock a loan, etc.
- **Why It's Important:** Teraverde's Batch Update Utility lets you update data within fields as well as trigger business rules for all loans within the batch. No need to go into each individual loan when a batch of loans are sold, investor data is updated, updating loan program names, workflow etc. This is a great utility to manage data and business rules for a power user.
  - **How Does It Increase Productivity?** This Utility lets loan level data in a group of loans be updated with a single action by the Encompass administrator or other authorized user.
  - **Does the Utility Integrate with Other Teraverde Products?** Absolutely. The Batch Update Utility is fully integrated with SpeedPath® and all other Teraverde Productivity Solutions.
- **What's Included?** The Batch Update Utility licensed code, Installation Guide and Administrator's Guide.

### Pricing:

Lenders closing > 2,000 loans per year: \$3,750 single payment  
Lenders closing < 2,000 loans per year: \$2,500 single payment
